

# DOORBOWS

## How to Attach Your Door Bow

1. Unpack the Door Bow - you will find a long piece of material, a shorter piece of material, a small square piece of material, your bow with safety pins already attached to the bow.
2. Start from the inside of your door and wrap the larger piece of material vertically from the top to the bottom, tying together at the front of the door. Where you tie the material will be the positioning of the bow so tie in the correct position, adjust the position if necessary by gently pull the material.
3. Take the shorter length of the material and from the back of your door to the front of your door wrap in a horizontal position.
4. This will create a criss cross effect - just like wrapping a rectangular gift box.
5. Take the small square piece of material and use this to tie the meshes together on your door, this will create the pull in effect in the centre of your door, just like wrapping a present.
6. You could easily straighten up the material at this point, fan them out at the edges of your door to create a more shaped effect maybe - but be careful not to cover any part of the locking mechanisms around the edge of the door ! You may want to adjust a little if you don't want to cover the letterbox. Bows off centre look very stylish and your postman will love you.
7. Take the bow and tie it with the attached ties on the reverse - do this at the point where your material meets, pull as tight as you can and double knot. WOW its looking good!
8. On the back of the bow you will find 2 safety pins, make sure your bow is straight - use these to discreetly pin the back of the bow to the horizontal material - this will help keep your bow in a straight position and help protect it from the wind etc..
9. Step back, take a look, smugly smile at your neighbours unwrapped doors, take a pic and send it to us - we love to see the bows in their new homes.
10. We can't guarantee our bows will be ok to use again but many customers tell us they do - so finished with your bow, want to use it again? Unpin the safety pins, remove the bow - perhaps give it a dust off if needed. Wrap carefully for next time - make sure it is dry before storing. Untie those knots and carefully fold the material away for next time.
